

The Road To ESOS

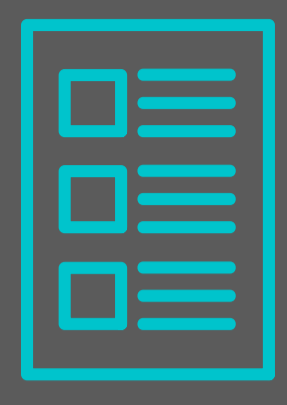

Figure out what makes up your total energy consumption

Make sure the data can be collected

Review reports that already exist for energy management schemes

Plan out the assessment and allocate who is doing what

Figure out what should be assessed so it constitutes 90% of your total energy consumption

Make a start on measuring your total energy consumption

Carry out the planned energy audits

From the energy audits, identify the opportunities to improve the energy efficiency

Collect all the relevant information to prove compliance

Inform the Environment Agency by the 5th December of compliance

Director & Lead Assessor to sign off the final assessment
